PHP Programming with PEAR reviewed

Cal Evans, editor of the Zend Developer Zone, wrote a review of "PHP Programming with PEAR", the book I wrote together with Carsten Lucke, Aaron Wormus and Stoyan Stefanov.

The review is very positive and what's especially nice about it, is, that he liked Chapter 4 (Web services) the most and this is one of the chapters that I wrote. If you are interested in buying a copy of the book, you can find more information at the book website, which has been set up by Aaron. And of course you can directly order it at Amazon.com.
